

Special Notification

All FRM Members:

Yesterday, (October 11, 2018) at the Fresno Radio Modelers – General Membership Meeting, the members present were notified about two major and difficult decisions derived from a special board meeting held earlier in the week.

The decisions were not made without significant discussion and consideration; but, were decided on by the Executive Board based on two immediate necessities; First to ensure that the resurgence of encroachment over the neighboring property would be mitigated; and, Second to ensure that only paid up members receive the benefits of the use of the FRM Field at Avenue 12.

The decisions are as follows:

(1) No IMAC structured maneuvers for competition are allowed at the field. IMAC was further defined as the sequence of connected aerobatic maneuvers associated with IMAC competition practice.

(2) It has always been mandatory for AMA Cards to be displayed to fly at the field. This has become lax and to correct this going forward, without an AMA card displayed; no flying is allowed under any conditions. Also, please note that AMA cards should be affixed with the FRM membership sticker. Stickers can be obtained from Membership Chair - Craig Roberts.

Your adherence to these policies will ensure that we can continue to utilize the field at Avenue 12 for years to come.

Respectfully,

FRM President Aaron Flores
